

Matrix Federation

A V1 offering is available that demonstrates interoperability capabilities focusing on federation to Element, covering the following use cases:

- Connecting Mattermost to Element channels
- Initiating and participating in Direct and Group messages
- Support for formatting, editing, deletions, replies/threads, attachments, presence, and typing notification

A short (5 minute) introduction to using the Matrix Bridge is [available here](#)

Next step: [Validation of solution](#) by your teams for input on future iterations.

NextCloud Integration

A V1 offering is available that demonstrates integration capabilities covering the following use cases:

- Connect users Mattermost account with Nextcloud
- Share public link for user file in Mattermost channel
- Show user calendars in Mattermost
- Upload user files to Nextcloud

There's an existing [NextCloud-to-Mattermost integration](#) that NextCloud built as well that integrates Mattermost access from Nextcloud

Next step: [Validation of solution](#) by your teams for input on future iterations.
